

Darrel Drinan
Founder and President/CEO
PhiloMetron

PhiloMetron is a therapy management accelerator that spins out at value points applications of its wireless Therapeutic Management of System for applications in chronic and quality of life remote healthcare. Prior to starting PhiloMetron, Mr. Drinan was the Director of New Program Management for Braun ThermoScan, a \$2B subsidiary of the Gillette Company. He led R&D activities with a \$20M annual budget for new consumer medical products for Braun, including several years of research in wireless, non-invasive, medical sensing applications markets. He led multi-disciplined development teams of 5 to 25 personnel from several countries. Mr. Drinan holds a BS in Productions/Operations Management from Arizona State University and an MS in Business, from a General Dynamics in house program conducted by West Coast University and University of San Diego.
