### **Dr. Anupam N. Shah**

Anupam Shah is a Vice President, and Chief Engineer at SAIC. His specific focus is in the delivery of high performance converged network systems for the U.S. Federal Government clients. Anupam was involved in the initial development of Transmission Control Protocol (TCP) and definition of Internet Protocol (IP) in 1970's, and he has had continual involvement throughout the evolution of communication network technology, including IPv6.

Since joining SAIC 15 years ago, Anupam has served in several roles – as Chief Engineer, as Engineering Manager, and as a business manager. In recent years his focus is on network operations systems and their integration with IT systems operations and security operations, particularly for command and control. He manages IR&D programs for high performance converged networks.

Anupam has received Ph.D. in Computer, Information, and Control Engineering from the University of Michigan, and M.B.A. from Virginia Tech. He is a certified PMP. He has served as a faculty member at the University of Maryland, and at the George Washington University.
