

Mark D. Naftzger
U.S. Geological Survey

Mr. Mark Naftzger is with the U.S. Geological Survey (USGS) in Reston, Virginia. He is currently the Deputy, Geospatial Information Office, assigned to the headquarters staff of the Associate Director for Geospatial Information. Mark also serves as the Chief of the Emergency Operations office and is a senior advisor on strategic planning and program development for the National Geospatial Program. He is currently working with the homeland security, homeland defense, and emergency management communities to link USGS's Geospatial Program activities with other homeland security and homeland defense programs and initiatives across Federal, State, and local governments to insure current and accurate geospatial data is available for homeland security and homeland defense activities.

Mr. Naftzger received his Bachelor of Science degree from Weber State University and a Master of Science degree from George Mason University. He is a recent graduate of OPM's Federal Executive Institute. Mark is a member of the National States Geographic Information Council and the Association of American Geographers and actively participates in Federal Geographic Data Committee and HIFLD working groups.
