

**James C. Seitz III, Headquarters, Defense Information Systems Agency, Joint Staff Task Force Liaison** serves the Defense Information Systems Agency and its GIG Operations Directorate as the Joint Staff Task Force Liaison supporting Vice-Chairman Joint Chiefs of Staff information technology initiatives and the National Military Command System Transformation effort.

His current responsibilities and interactions with the Joint Staff have brought focus, strategy and solutions for information sharing at the enterprise level. Enterprise Thin-client is one of the information technology initiatives.

Mr. Seitz's government service career spans 32 years. His background covers information technology and telecommunications assignments for the United States Air Force, National Guard and the Defense Information Systems Agency. His experiences cover acquisition, fielding, operations and program management at the headquarters, division and operational unit levels for strategic, tactical and mobile operations. He shares an extensive background in command and control, joint operations, interoperability testing and in supporting transitional and converging requirements between government and international activities. He served two tours as the Defense Information Systems Agency's technical and management support office program manager in Baghdad, Iraq. There his staffs developed, engineered, fielded and transitioned information technology for the Coalition Provisional Authority, Department of Defense components, the Department of State and the Iraqi Government under Operation Iraqi Freedom.
