
Christopher A. Miller

Program Executive Officer Command, Control, Communications, Computers and Intelligence (C4I)

Mr. Miller is currently the Navy's Program Executive Officer for Command, Control, Communications, Computers and Intelligence (PEO C4I). Mr. Miller is directly responsible for more than 125 Navy C4I programs and provides the warfighter integrated communication, information technology, and intelligence systems that enable command and control of military forces. He is charged with managing the cost, performance, and schedule of these programs during design, development, production, and deployment. He directs a staff of 225 civil servants, 85 military, and more than 900 contractors that manage and execute over \$2billion annually.

Mr. Miller was appointed to the Senior Executive Service in May 2006 and has 14 years of Federal Service.

Mr. Miller is a graduate of the Naval Officer Reserve Training Corps and was commissioned as a Second Lieutenant, United States Marine Corps in May 1995. Upon completion of the The Basic School and the Naval Intelligence Officer's Basic Course, Mr. Miller was assigned to Marine Medium Helicopter Squadron 164 (HMM-164) in 1996, where he served as the squadron's Intelligence Officer. While assigned to HMM-164, Mr. Miller completed a deployment to the Western Pacific and supported *Operation Southern Watch*. In 1998, Mr. Miller was assigned to Marine Aircraft Group 16 (MAG-16) where he served as the Intelligence Officer for the largest Marine Aircraft Group in the Marine Corps. In this capacity, he coordinated intelligence support and training for 12 deploying squadrons and provided C4I leadership. Mr. Miller left active duty Naval Service in May 1999.

Mr. Miller was employed by Booz | Allen | Hamilton in San Diego, California from 1999 through 2001 where he held various management positions in program management and strategic planning. While a consultant, Mr. Miller supported numerous Navy command and control programs and was integral in coordinating their Year 2000 transition.

He started his civilian service in 2001 and held various positions within the Space and Naval Warfare System Command. In 2001, he began his career as a system engineer for PD-15 and led the development of a common Windows 2000 PC software baseline to replace the legacy Microsoft NT baseline. This software baseline is now the foundation of the Navy's largest tactical network, known as Information Technology 21 (IT-21). In the winter of 2005, Mr. Miller was selected as the Director of Modernization for PEO C4I where he was charged with establishing C4I Network Centric Warfare (NCW) objectives and roadmap to drive program execution and alignment with FORCENet and Open Architecture initiatives.

Mr. Miller attended Vanderbilt University in Nashville and graduated in 1995 with a bachelor's degree in american history and political science. He has attended numerous classes from Defense Acquisition University and is certified level III in program management.

Mr. Miller is a member of the Acquisition Professional Corps, Armed Forces Communications and Electronics Association (AFCEA), and the United States Naval Institute. He has received several awards for his service including a Navy and Marine Corp Achievement Medal, the AFCEA and USNI Copernicus Award, and the USD (AT&L) Workforce Development Award.
