

Profile: Will Harrison

Mr. Will Harrison is a Business Process Engineer with over 15 years of professional experience that includes the Intelligence Community (IC), Department of Defense (DoD), Department of Justice (DoJ), and Healthcare. He has hands-on experience in analyzing and designing the activities and workflow in and around an organization. He has performed concurrent examination and redesign of information technologies and organizations that support processes while demonstrating breakthrough thinking for dramatic business results. He specializes in project design support, facilitation, and process-analysis tools and practices that ensure the success of a company business process improvement program. Will places an emphasis on building strong customer relationships and has demonstrated success leading cross-functional teams.

His technical strengths include mapping and definition methodology, the verification of technical requirements, and the coordination of business improvement processes; his work experience includes military service. He has hands-on experience in all phases of the Systems Development Lifecycle including Agile, Waterfall and usage of Lean principles. As a certified project manager with an advanced degree in Computer Systems Management, he utilizes his professional and leadership skills to design, develop, deliver and validate technical requirements.

Technical Focus Areas:

1. Business Process Management
2. System Integration
3. System Engineering
4. Program/Project Management
5. Information Assurance (Cross Domain Solutions)
6. Consultancy (Management, Information Technology, Business Intelligence)
