

Dr. Cindy Daniell became the Director of the Research Directorate for the National Geospatial-Intelligence Agency in June 2018. She brings over 30 years of experience in the Department of Defense (DoD) community from both government service and private industry. This prior experience focused largely on the technology development of image processing, computer vision, AI, and the integration of these technologies into systems.

Her most recent position was as Program Director for the Advanced Technology and Systems Division at SRI International. Prior to that, she was a Program Manager in the Defense Sciences Office of DARPA from 2006 to 2012, leading a portfolio of R&D programs advancing technologies of interest to the DoD and Intelligence Community. She began her career on the technical staff at Hughes Aircraft Company and then HRL Laboratories.

Dr. Daniell has a BS in electrical engineering from the University of South Alabama and an MS and PhD in electrical engineering from the California Institute of Technology. She holds three patents and has authored or coauthored 12 peer-reviewed publications.
