

Elizabeth Lawler

**Founder
AppLand, Inc.**

Elizabeth Lawler is a serial-entrepreneur and Founder of AppLand, Inc. Previously she was Vice President, DevOps Security at CyberArk (CYBR) responsible for CyberArk's DevOps business strategy and execution, including launching the open-source GTM strategy for dev-focused tools and technologies. She founded Conjur (acq. CyberArk) which was the first product in the market to address Privileged Account Security gaps for DevOps, cloud and container-native software. She was also Chief Data Officer of Generation Health (acq. CVS Caremark) and held national leadership positions in research at the Department of Veterans Affairs. She is a data scientist and programmer by training and holds a doctorate and a masters from Boston University.
