Kent Malwitz is the President of UMBC Training Centers, UMBC’s non-credit workforce development enterprise. Kent is a graduate of UMBC with a degree in Information Systems and has 25 years of experience in the field of IT talent, covering technical consulting services, IT staffing and technical training.

Under Kent’s leadership, Training Centers has become a world class provider of professional and technical training to the federal government, businesses and individuals seeking new careers and professional development.

Training Centers' core training and certification areas include:
- Big Data/Data Analytics
- Cloud Computing, Virtualization & DevOps
- Cybersecurity
- Software Development
- Linux and Red Hat Certification
- Project Management/Agile
- Leadership & Innovation

In Augusta, UMBC Training Centers is delivering technology training to the United States Army and the Intelligence Community on several major contracts. Most recently, in September of 2019, UMBC Training Centers was selected by the U.S. Army Cyber Center of Excellence to develop a 72-week hands-on training program to support the Army’s Cyberspace Capabilities Developer Technician occupation. This program builds on the Tool Developer Qualification Course (TDQC) that Training Centers has been delivering to the Army at Fort Gordon and Fort Meade for the past several years.

In 2020, Training Centers plans to roll out IT and cyber training programs to help soldiers transitioning out of the military prepare for and obtain new careers in these high demand fields.

In Augusta, Training Centers delivers training out of Cyberworks Academy, a state of the art training facility at historic Sibley Mill.
