

Office of the Director of National Intelligence  
Washington DC 20611

## **Jim Richberg**

Jim Richberg currently serves as the National Intelligence Manager for Cyber, helping to oversee and integrate the US Intelligence Community's collection and analytic activities and serving as principal substantive advisor to the Director of National Intelligence (DNI) on cyber issues. He leads the IC in developing and implementing a Unifying Intelligence Strategy for Cyber that identifies and addresses key focus areas, the associated information gaps, and specific longer term cyber challenges that require broad and sustained attention by the Intelligence Community. Mr. Richberg was one of the principal architects of the Cyber Threat Intelligence Integration Center that the President directed the DNI to establish in 2015. Prior to becoming the National Intelligence Manager, Mr. Richberg monitored and coordinated implementation of the whole-of-government Comprehensive National Cybersecurity Initiative (CNCI) from its inception in 2008 through its conclusion in 2013. He received a Presidential Rank Award in 2016 in recognition of his sustained accomplishment as a Federal Executive and his impact on national security and on cybersecurity.
