**“Labor is the single biggest driver. People talk about power and location, and those are factors. But labor dominates this cost so much that it’s really what you have to understand. We’ve got to look at how many people are doing what. If you still have a lot of people doing monitoring and maintenance of servers, that is a bad use of people – those processes can be automated.”**

**- Terry Halvorsen, DOD CIO, on data center consolidation drivers**
