

TED GLUM

Ted J. Glum is the former Director of the US Defense Microelectronics Activity (DMEA), serving in that capacity from its inception in 1996 to his retirement in 2018. As the Director, Mr. Glum reported to the Assistant Secretary of Defense for Research and Engineering, (ASD (R&E)), and was responsible for over \$2 Billion of microelectronics technology programs in addition to numerous classified programs for the Department of Defense (DoD) and Intelligence Community.

Prior to assuming the duties of the Director for DMEA, he served as the Chief of the Science and Engineering Division within the US Air Force Material Command (1994-1996). In this capacity, he was responsible for the Air Force's Advanced Microelectronics Program, Advanced Composites Program, Electro-optics Program, and the Physical Science Special Testing Program.
