Revolutionizing USAF/USSF Capabilities – Artificial Intelligence (AI)

“You don't understand anything until you learn it more than one way”

-- Prof Marvin Minsky MIT

- analytics and learning techniques that formulate multiple perspectives;
 - explain perspectives, recommendations and options
 - not just “derivative AI”, but expanding the science of “AI”

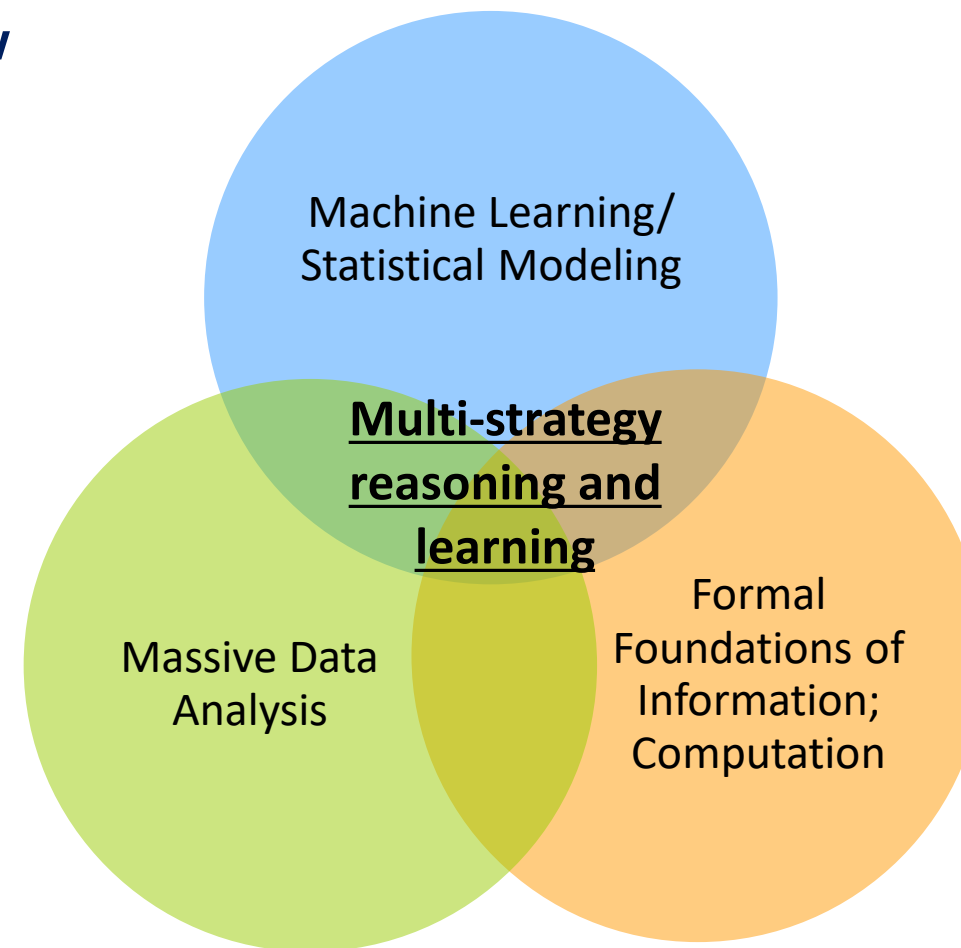

Overview

OBJECTIVE:

This program seeks to advance the science of machine learning and reasoning in terms relevant to the USAF/USSF

RESEARCH AREAS :

- machine learning
- analytics
- formal foundations

Integration of a diversity of numerous reasoning and learning “machines”

ACM Turing Awards
IJCAI Research Excellence Award
Benjamin Franklin Medals
IEEE Frank Rosenblatt Award
ACM AAI Allen Newell Award
MIT Killian Award
Bocher Prize
Kampé de Fériet Award
MIT MacVicar Award

Fields Medal
Rank Prize
Kolmogorov Medals
IEEE Neural Networks Pioneer Awards
AAAI Feigenbaum Prize
Wolf Prize in Math
Salem Prize
Prize NEC/C&C Foundation
J. S. McDonnell Complexity Science Scholar Award

Japan Prize
Robert Wood Prize for Optoelectronics
IEEE John von Neumann Medals
BBVA Foundation Frontiers of Knowledge Award
Chevalier de la Legion d' Honneur
Bergman Prize
Alan T. Waterman Award Paris Kanellakis Award
IJCAI Computers and Thought Awards

Vannevar Bush Faculty Fellow
Sloan Research Fellowship
Warren D. White Award
PECASE Presidential Early Career Award for Scientists and Engineers
International Quantum Communication Award

MacArthur Fellow
ONR Young Investigator Awards
IEEE Aerospace and Electronic Systems

NSF Presidential Young Investigator Award
NSF Career Awards

Forbes Magazine 30 Under 30 Rising Stars in Science
IEEE PAMI Distinguished Researcher Award

Member American Philosophical Society
Members National Academy of Engineering
IEEE Fellows
AAAS Fellows

Members American Academy of Arts and Science
Member Argentine National Academy of Sciences
ACM Fellows
American Physical Society Fellow

Members National Academy of Inventors
AAAI Fellows

- Industry Start-up: Conexus AI Corp enabled from work in categorization theory leading to innovations in databases
- New inventions: frame-based systems, support vector machines (SVMs), neural net-back propagation, deep learning-convolutional neural net, confocal microscope, never ending learning, perceptrons...

Revolutionizing USAF/USSF Capabilities – Machine Intelligence

- **lead with the finest scientist**

Fox, Lecun, Tenenbaum, Vapnik, Fefferman, Baraniuk, Maggioni, Selman, Gomes, Spivak, Papandreou, Li...

- **get out of the box** – dramatic theories

England, Minsky-Winston-Davis, Mitchell, Lloyd, Fragkiadaki, Cap-Rogers...

- **collaboration** within the programs

- **next:**

- mixed-initiative interaction
- autonomous systems that learn with
- biophysics of memory and learning
- novel computational platforms

October 27, 2021 | 2-4pm EST | [Register Here](#) | [More Info](#)

In the year 2040 and beyond, there are outstanding questions to consider to explore significant advances in learning/reasoning..... AND during the next two decades there are fascinating questions that will guide us to 2040.....

THIS IS THE FIRST IN A SERIES OF 2 HOUR SESSIONS WITH LEADERS IN SCIENCE/MATH INTERACTIONS BY ALL – SPEAKERS AND AUDIENCE

AFRL
Air Force Office of Scientific Research

In the year 2040 and beyond, there are outstanding questions to consider to explore significant advances in learning/reasoning..... AND during the next two decades there are fascinating questions that will guide us to 2040.....

AN ONGOING SERIES OF 2 HOUR SESSIONS WITH LEADERS IN SCIENCE/MATH
 Host: Benji Maruyama, AFRL Materials and Manufacturing Directorate
 Co-host: Doug Riecken, AFOSR PO
 INTERACTIONS BY ALL – SPEAKERS AND AUDIENCE
