

Digital Transformation & Automation through Design Thinking & AI/ML

Node.Digital empowers federal agencies and commercial enterprises with proven AI, automation, and cybersecurity solutions, achieving mission-critical outcomes. We are SBA 8(a) certified, minority-owned small business with deep, real-world cybersecurity and application development experience. We deliver results that enhance operational efficiency and user satisfaction across federal, commercial, and financial sectors.

Technology Partnerships

What Sets Us Apart

Our solutions empower clients to optimize workflows, maximize efficiency and ensure mission success.

Innovative Engineering for Hard-to-Solve Problems

Experienced in digital transformation, AI/ML, and automation, delivering efficiency, cost savings, and mission success.

Outcome Driven to Maximize Value

Committed to achieving measurable results, focusing on value delivery that elevates performance and meets mission needs.

Advanced Security and Compliance

Rapid and secure solutions supported by cybersecurity experts, strengthened by facility clearance and designed with tailored, compliant frameworks.

Core Service Areas

Transform

Unlock new levels of digital capability and adaptability by aligning advanced technologies with mission objectives

Advisory Services

Strategic guidance in AI, digital transformation, and data management, including Human-Centered Design and RPA/AI Centers of Excellence.

Modernization Services

Full-stack development (cloud-native, mobile, AI/ML), domain-driven architecture, and data management enhancements.

Generative AI

Conversational AI, synthetic data, and advanced prompt engineering to improve outcomes and efficiency.

Automate

Drive process efficiency, agility, and transformation with intelligent automation that enhances productivity and accelerates decision-making

Intelligent Automation

Streamlined workflows, intelligent document processing, and digital assistants to boost productivity.

Data Engineering & Intelligence

Predictive analytics, semantic intelligence, and edge AI for data-driven decision-making.

Cyber Automation

Strengthening security with cyber analytics, AIOps, SOAR, and security bots.

Operate

Ensure secure and resilient operations by providing stable environments that uphold performance standards and meet compliance requirements

AI Agents

Operational support, knowledge retrieval, and natural language processing to optimize performance.

AI Engineering & Operations

Managing AI/ML lifecycle (LLMOPS), focusing on monitoring, compliance, and secure deployment.

Platform Engineering

Secure, robust cloud environments with AI-enhanced DevSecOps, observability, and SRE practices.

Solutions and Accelerators

ITAP

A SaaS platform that simplifies program transitions with built-in automation.

Digital Forms Factory

AI-powered document processing that extracts insights from both structured and unstructured data.

COCO

An AI digital assistant for product inquiries, recommendations, and social selling.

HyperDetect

AI-driven threat detection platform that leverages MITRE ATT&CK and ATLAS frameworks to identify multi-stage attacks.

Beluga

A cloud-native analytics platform for large-scale, real-time data processing.

Human Experience Driven Development

Our HxD methodology integrates Human Experience Framework, Agile Engineering, and Stakeholder Engagement best practices to deliver impactful and mission-aligned solutions. It is built upon three foundational principles:

Human Experience Framework

We combine Human Centered Design with tools to draw on user insights and feedback to design solutions that not only meet real user needs but also elevate the overall experience, fostering better engagement and satisfaction.

Agile Engineering

Our agile approach facilitates rapid ideation, iterative testing, and data-driven decision-making, fostering continuous improvement and alignment with stakeholder priorities.

Stakeholder Engagement

We focus on mission objectives, ensuring that each product iteration meets critical requirements and delivers measurable outcomes.

Certifications & Contract Vehicles

Contract Vehicles:

GSA MAS (47QTCA21D001U)

SIN 518120C

SIN 54151S

SIN 541611

OASIS+ Master Contracts

8(a) (47QRCA25DA058):

Management & Advisory Domain

Technical & Engineering Domain

Small Business (Apparent Awardee):

Management & Advisory Domain

Technical & Engineering Domain

Primary NAICS Codes:

541511	Custom Computer Programming Services
541512	Computer Systems Design Services
541690	Other Scientific and Technical Consulting Services
541519	Other Computer Related Services
541611	Administrative Management and General Management Consulting
