

Christopher Etesse, founder of Fusion Cyber Inc. and Fusion Centers Inc., previously led a successful 3-year restructuring of Flat World Knowledge, relocating it to Washington, DC, rebuilding the team, and pivoting it into a competency-based learning platform. With over 20 years in enterprise SaaS and cybersecurity, he has developed \$100M+ user solutions and held executive roles including Chief Product Officer at Monster Gov Solutions (supporting DoD and civilian agency hiring) and Presidium (acquired by Blackboard for \$65M), and was one of Blackboard's first 20 employees. His career

spans public-private innovation in cloud and enterprise technology, with a forward-looking vision for virtual education that keeps the teacher-student relationship central to creating broad opportunity.

FUSION
C Y B E R

Fusion Cyber is the Mars shot for solving the trillion-dollar problems of education, workforce readiness, and operational inefficiency. We are revolutionizing how organizations train, operate,

and scale by unleashing AI agents that work harder, smarter, and faster. Fusion has cracked the code on real-time, 24/7 AI-driven education and operations by delivering solutions that solve human training and workforce management bottlenecks. And here's the kicker: we have built a platform that trains in real-time with the most relevant, up-to-date content. Our platform doesn't just run programs; it updates as organizations evolve, ensuring it's always ahead of the curve.
